Backtested statistics cover January 2022 – August 2025.
All findings are hypothetical, for educational purposes only.

Dataset and Methodology

Data source: BacktestMarket.com
Instrument: Nasdaq Futures (NQ)
Timeframe: January 2022 → August 2025
Resolution: 1-minute OHLCV data
Timezone: Converted from Chicago (CT) → New York (ET)
Sample size: 719 trading days
Average Asia range: 70.86 points

Each trading day was divided into four core sessions (ET):

```
-----
NQ Trading Sessions (New York Time)
Asia:      20:00-00:00 (prev day → current day)
Pre-London: 00:00-02:00 (current day)
OpeningRange: 02:00-03:00 (current day)
London:    03:00-05:00 (current day)
-----
```

ABOUT

Asia defines the volatility regime for the entire day.

- **Large Asia (> 70.9 pts)** → High probability of strong continuation after OR ($\approx 69 - 87\%$) with faster resolution (2–12 min).
- **Small Asia (≤ 70.9 pts)** → Shorter expansions ($\approx 17-29$ pts), more retests, and slower development (6–12 min).

Benchmarks (all days):

- Average Asia range: 70.86 pts
- Average Pre-London range: 45.08 pts
- Average Opening Range (02:00): 44.73 pts

High-Level Probabilities

These aggregated probabilities help identify the likely path for the London session based on Asia range and Pre-London behavior.

Context	London Sweep Rate	Bias	Median Penetration (pts)	Median Time (min)
Asia ↓ & PL Low → OR High (Small Asia)	76.9 %	Bullish	+24.8	6.0
Asia ↓ & PL High → OR Low (Small Asia)	81.9 %	Bearish	-29.5	6.0
Asia ↑ & PL Low → OR High (Large Asia)	86.1 %	Bullish	+38.3	2.0
Asia ↑ & PL High → OR Low (Large Asia)	72.1 %	Bearish	-38.7	5.5

Step 1 – Classify the Day at 02:00 ET

At the Opening Range start:

- 1. Measure Asia range (20:00–00:00 ET).
 - > 70.9 = Large
 - ≤ 70.9 = Small
- 2. Identify what **Pre-London** did to the Asia range:
 - No sweep
 - Swept High
 - Swept Low

This combination defines the **Opening Range bias** (High vs Low vs None).

A. Opening Range (02:00–03:00) — First sweep bias

Interpretation: before OR is done, *which side is more likely to be swept first* given Asia size and what Pre-London did to Asia.

Large Asia (*more than 70.9 pts*)

Pre-London vs Asia	Sample (n)	First sweep = High	First sweep = Low	No sweep
No sweep	20	40.0%	50.0%	10.0%
Swept High	125	37.6%	52.8%	9.6%
Swept Low	98	50.0%	33.7%	16.3%

Quick read: With a large Asia, OR leans Low-first after PL swept High, but leans High-first after PL swept Low. With PL no sweep, it's roughly balanced, slight Low-first tilt.

Small Asia (*less than 70.9 pts*)

Pre-London vs Asia	Sample (n)	First sweep = High	First sweep = Low	No sweep
No sweep	21	52.4%	42.9%	4.8%
Swept High	189	38.6%	52.9%	8.5%
Swept Low	259	54.1%	37.5%	8.5%

Quick read: With a small Asia, OR leans High-first after PL swept Low and Low-first after PL swept High. With PL no sweep, slight High-first tilt.

Practical takeaway: The sweep direction of Pre-London vs Asia is the dominant clue for which side OR probes first.

• PL swept High → Low-first bias in OR

Quick read: Large Asia tends to **flip** the Pre-London direction.

A Pre-London high sweep often leads to a low-first OR break, and vice-versa.

Asia ABOVE average (> 70.9 pts) — START 02:00 OR

Did Pre-London sweep Asia HIGH?

YES (PL swept HIGH) [n=125 | CONF: Strong]

- Primary: FLIP ↓ (sweep PL Low) = 48.8%
- Opposite: FOLLOW ↑ (sweep PL High) = 32.8%
- Noise: BOTH = 8.8% | NONE = 9.6%
- Bias: SHORT (flip favored)
- Medians: flip pushes = 20-22 pts, ~6-14 min
- Plan: First clean break of PL Low → quick retest → SELL.
TP1 = ½ median; TP2 = median; runner only if tape accepts below.

NO → Did Pre-London sweep Asia LOW?

YES (PL swept LOW) [n=98 | CONF: Strong]

- Primary: FLIP ↑ (sweep PL High) = 43.9%
- Opposite: FOLLOW ↓ (sweep PL Low) = 27.6%
- Noise: BOTH = 12.2% | NONE = 16.3%
- Bias: LONG (flip favored)
- Medians: flip pushes = 20-22 pts, ~7-15 min
- Plan: First clean break of PL High → retest → BUY.
Scale a touch quicker if OR prints "Both/None".

NO (PL NO SWEEP) [n=20 | CONF: Low]

- Outcomes: PL Low = 45% | PL High = 40% | Both = 5% | None = 10%
- Bias: Slight SHORT tilt, but two-way risk is high.
- Medians: typical OR legs = 16-20 pts (use 14-16 if shallow open).
- Plan: Trade the **first decisive** PL-edge breach + retest only.
If OR "None": stand down and let London set the move.

Opening Range (02:00 – 03:00 ET)

Asia Below Average (≤ 70.9 pts)

Asia BELOW average (< 70.9 pts) — START 02:00 OR

```
Did Pre-London sweep Asia HIGH?
|
| YES (PL swept HIGH) [n=189 | CONF: Strong]
| • Primary: FLIP ↓ (sweep PL Low) = 49.7%
| • Opposite: FOLLOW ↑ (sweep PL High) = 36.0%
| • Noise: BOTH = 5.8% | NONE = 8.5%
| • Bias: SHORT (flip favored)
| • Medians: flip/follow legs = 12-14 pts, ~4-10 min
| • Plan: First break of PL Low → retest → SELL.
|         Book to medians (small Asia → shallower pushes).
|
| NO → Did Pre-London sweep Asia LOW?
|
| YES (PL swept LOW) [n=259 | CONF: Strong]
| • Primary: FLIP ↑ (sweep PL High) = 51.7%
| • Opposite: FOLLOW ↓ (sweep PL Low) = 30.1%
| • Noise: BOTH = 9.6% | NONE = 8.5%
| • Bias: LONG (flip favored)
| • Medians: flip/follow legs = 12-14 pts, ~4-9 min
| • Plan: First break of PL High → retest → BUY.
|         Targets to medians; be picky on acceptance at the edge.
|
| NO (PL NO SWEEP) [n=21 | CONF: Low]
| • Outcomes: PL High = 47.6% | PL Low = 33.3% | Both = 14.3% | None = 4.8%
| • Bias: Slight LONG tilt (more High sweeps), but "Both" risk ↑.
| • Medians: = 12-14 pts, ~5-10 min
| • Plan: Trade first clear PL-edge breach + retest; take profits faster on "Both".
```

London Session (03:00 – 05:00 ET)

What Typically Happens After OR Breaks

Once the Opening Range establishes a direction (High or Low break), the London session often expands that move.

Continuation probability: **~69 – 87%** depending

[ASK HERMAN AI](#) [HOME](#)

[PROBABILITY MAPS](#)

[TRADER PSYCHOLOGY](#)

[LEARNING HUB](#) [ABOUT](#)

B. London (03:00–05:00) — What tends to happen after OR breaks

Once OR completes (you know whether OR broke High or Low), use the table below to set expectations for London's first sweep, typical time-to-sweep, and median penetration beyond the OR edge.

Notes:

• "First sweep" = which OR side London hits first.

• "Median time" = minutes from 03:00 to that first sweep.

• "Median penetration" = how far beyond the OR level the first sweep typically travels.

• High sample sizes are bolded; tiny n (≤10) means be cautious.

London follow-through (by Asia size → PL vs Asia → OR outcome)

Asia size	PL vs Asia	OR outcome	London first sweep	%	Median time	Median penetration
Large	Swept High	OR High (n=41)	High	60.98%	12.0 min	24.87 pts above OR High
Large	Swept High	OR Low (n=61)	Low	62.30%	5.5 min	38.68 pts below OR Low
Large	Swept Low	OR High (n=43)	High	72.09%	2.0 min	38.28 pts above OR High
Large	Swept Low	OR Low (n=27)	Low	77.78%	4.0 min	27.53 pts below OR Low
Large	No sweep	OR High (n=8)	High	62.50%	3.5 min	44.90 pts above OR High
Large	No sweep	OR Low (n=9)	Low	55.56%	~0–1 min	34.50 pts below OR Low
Small	Swept Low	OR High (n=134)	High	58.96%	6.0 min	24.78 pts above OR High
Small	Swept Low	OR Low (n=78)	Low	51.28%	5.0 min	13.96 pts below OR Low
Small	Swept High	OR High (n=68)	High	58.82%	3.0 min	17.43 pts above OR High
Small	Swept High	OR Low (n=94)	Low	61.70%	6.0 min	29.51 pts below OR Low
Small	No sweep	OR High (n=10)	High	80.00%	8.0 min	29.57 pts above OR High
Small	No sweep	OR Low (n=7)	Low	57.14%	0.5 min	18.24 pts below OR Low

What this means for trade planning:

• Continuation is common. If OR breaks High, London's first sweep often favors High (esp. when PL had swept Low or Asia was small). If OR breaks Low, London's first sweep often favors Low (esp. when PL had swept High or Asia was large).

• Timing is quick. When London favors the continuation side, the median time to that first sweep is often 2–8 minutes. Opposite-side first sweeps tend to take longer.

• Penetration guides targets. Typical first moves extend ~17–39 pts beyond the OR edge (varies by branch). Use this for TP1/TP2 setting and to size a stop buffer outside the OR edge.

Range-expansion note: In many high-n branches, London expands the OR range ≥ ~90% of the time, and in several, both OR edges are eventually swept. If you're running a "runner," anchoring to 1.0× OR range is reasonable for exits in these branches.

↓

Asia Above Average (> 70.9 pts)

London Decision Tree and Statistics

This group shows **fastest continuations** and deeper penetrations (≈ 38 pts).

START: 03:00 London (ASIA ABOVE average > 70.9 pts)

Determine OR (02:00-02:59) vs Pre-London outcome, then follow the branch.
(n shown per branch; use extra caution when n<10)

- OR SWEEP HIGH
 - PL SWEEP HIGH (n=41)
 - First sweep: High 61.0% | Low 39.0%
 - Medians: +24.87 pts (12.0m) | -51.89 pts (8.5m)
 - Close if London sweeps High → Bullish 73.3% ; if Low → Bearish 61.5%
 - Range expansion: 95.1%
 - TRADE: Bias ****long****. Buy the retest/reclaim of OR High; TP ladder ~25-30 pts. If immediate rejection, be ready for reversal run to OR Low (faster & deeper).
 - PL SWEEP LOW (n=43)
 - First sweep: High 72.1% | Low 25.6%
 - Medians: +38.28 pts (2.0m) | -21.24 pts (15.0m)
 - Close if London sweeps High → Bullish 75.7% ; if Low → Bearish 38.9%
 - Range expansion: 81.4%
 - TRADE: ****Continuation UP**** setup. Buy pullback to OR High after quick take. Faster upside (2m) suggests using a stop just under OR High; trail early.
- OR SWEEP LOW
 - PL SWEEP HIGH (n=61)
 - First sweep: High 37.7% | Low 62.3%
 - Medians: +38.93 pts (14.0m) | -38.68 pts (5.5m)
 - Close if London sweeps High → Bullish 88.0% ; if Low → Bearish 63.6%
 - Range expansion: 93.4%
 - TRADE: Bias ****short****. Sell retest of OR Low; quicker move down (~5-6m). If contrary squeeze above OR Low, flip to reclaim-long only on solid close.
 - PL SWEEP LOW (n=27)
 - First sweep: High 22.2% | Low 77.8%
 - Medians: +51.97 pts (21.0m) | -27.53 pts (4.0m)
 - Close if London sweeps High → Bullish 72.2% ; if Low → Bearish 57.1%
 - Range expansion: 96.3%
 - TRADE: ****Down-continuation**** is dominant. Prioritize short; TP1 ~15-20, TP2 ~20-25. If price rips through OR Low and instantly reclaims, the squeeze upside can be
- OR SWEEP BOTH
 - PL SWEEP HIGH (n=11)
 - First sweep: High 36.4% | Low 63.6%
 - Medians: +79.36 pts (1.0m) | -52.02 pts (37.0m)
 - Close if London sweeps High → Bullish 75.0% ; if Low → Bearish 100.0%
 - Range expansion: 90.9%
 - TRADE: Two-sided potential. Initial fake moves are common. If Low goes first, expect a ****protracted**** sell run; manage runners.
 - PL SWEEP LOW (n=12)
 - First sweep: High 33.3% | Low 66.7%
 - Medians: +23.54 pts (5.0m) | -37.47 pts (12.0m)
 - Close if London sweeps High → Bullish 68.0% ; if Low → Bearish 77.8%
 - Range expansion: 91.7%
 - TRADE: Lean ****short****. If High goes first, treat as liquidity grab.
- OR NO SWEEP
 - PL SWEEP HIGH (n=12)
 - First sweep: High 55.0% | Low 45.0%

[PROBABILITY MAPS](#)

[TRADER PSYCHOLOGY](#)

[LEARNING HUB](#) [ABOUT](#)

A. Asia large (> 70.9 pts)

1) PL swept *Low* → OR swept *High* (n=43)

- London first sweep: High 72.1% (Low 25.6%).
- OR continuation: LDN sweeps OR High 86.1%.
- Median extension: +38.3 pts above OR High (≈ 2 min to sweep); 21.2 pts below OR Low (≈ 15 min).
- Read: Strong continuation higher; quick first push.

2) PL swept *High* → OR swept *Low* (n=61)

- London first sweep: Low 62.3% (High 37.7%).
- OR continuation: LDN sweeps OR Low 72.1%.
- Median extension: 38.7 pts below OR Low (≈ 5.5 min); 30.9 pts above OR High (≈ 14 min).
- Read: Down-bias continuation with decent follow-through.

3) PL swept *High* → OR swept *High* (n=41)

- London first sweep: High 61.0%.
- OR continuation: LDN sweeps OR High 73.2% (OR Low 63.4%).
- Median extension: +24.9 pts above (≈ 12 min), 51.9 pts below (≈ 8.5 min).
- Read: High-bias but two-sided; wrong-way flushes can be deep.

Takeaway (Asia large): Expect **directional continuation** from OR into London (first sweep aligns with the OR side 60–72% of the time). Median extensions after the sweep are ~25–40 pts, with occasional deeper squeezes (50+ pts) when the move flips.

Asia Below Average (≤ 70.9 pts)

London Decision Tree and Statistics

Smaller Asia sessions show **more retests** and slightly slower expansion (≈ 24–29 pts).

Continuations remain dominant, but patience is required — late reclaims or flip setups appear more frequently.

TRADER PSYCHOLOGY

LEARNING HUB ABOUT

START: 03:00 London (ASIA BELOW average < 70.9 pts)

Use the OR (02:00-02:59) result vs Pre-London, then follow the branch.
These are the highest-frequency regimes in small-Asia days.

OR SWEEP HIGH

- PL SWEEP LOW (n=134)
 - First sweep: High 59.0% | Low 38.8%
 - Medians: +24.78 pts (6.0m) | -26.24 pts (8.0m)
 - Close if London sweeps High → Bullish 75.7% ; if Low → Bearish 60.8%
 - Range expansion: 92.5%
 - TRADE: **Follow the OR High**. Buy retests; fast U-moves (=6m).
- PL SWEEP HIGH (n=68)
 - First sweep: High 58.8% | Low 39.7%
 - Medians: +17.43 pts (3.0m) | -22.91 pts (18.5m)
 - Close if London sweeps High → Bullish 46.8% ; if Low → Bearish 78.3%
 - Range expansion: 89.7%
 - TRADE: Lean **long**, but beware sizable downside if Low goes first.
Quick upside → scalps; deeper downside runs take longer to trigger.

OR SWEEP LOW

- PL SWEEP HIGH (n=94)
 - First sweep: High 38.3% | Low 61.7%
 - Medians: +20.3 pts (9.5m) | -29.51 pts (6.0m)
 - Close if London sweeps High → Bullish 63.0% ; if Low → Bearish 71.4%
 - Range expansion: 92.6%
 - TRADE: **Short the retest** of OR Low. Expect faster & larger downside.
- PL SWEEP LOW (n=78)
 - First sweep: High 48.7% | Low 51.3%
 - Medians: +22.05 pts (10.0m) | -13.96 pts (5.0m)
 - Close if London sweeps High → Bullish 79.7% ; if Low → Bearish 48.0%
 - Range expansion: 91.0%
 - TRADE: Balanced. Take the **first clean break & retest**.
If Low breaks first, targets are smaller; if High breaks, run can extend.

OR SWEEP BOTH

- PL SWEEP LOW (n=25)
 - First sweep: High 68.0% | Low 32.0%
 - Medians: +19.8 pts (3.0m) | -36.91 pts (21.0m)
 - Close if London sweeps High → Bullish 66.7% ; if Low → Bearish 61.5%
 - Range expansion: 88.0%
 - TRADE: Prefer **long**, but be alert: late-day drains after Low can be heavy.
- PL SWEEP HIGH (n=11)
 - First sweep: High 63.6% | Low 36.4%
 - Medians: +11.03 pts (7.0m) | -26.85 pts (53.5m)
 - Close if London sweeps High → Bullish 57.1% ; if Low → Bearish 87.5%
 - Range expansion: 90.9%
 - TRADE: Green light for **buy-the-reclaim** of OR High; if Low breaks first, volatility stretches through the hour – protect winners and trail.

OR NO SWEEP

- PL SWEEP LOW (n=22)
 - First sweep: High 63.6% | Low 36.4%
 - Medians: +24.2 pts (17.0m) | -15.45 pts (5.0m)
 - Close if London sweeps High → Bullish 84.2% ; if Low → Bearish 45.5%

Asia Below Average (< 70.9 pts) — OR Decision Tree

START: 02:00 Opening Range. First, what did Pre-London do vs Asia?

1) PL No Sweep of Asia (n=21)

- OR outcomes distribution: No Sweep 4.8%, Swept Low 33.3%, Swept High 47.6%, Both 14.3%
 - OR Swept High (n=10)
 - London first: High 80.0% (cont.) / Low 20.0%
 - Median penetration: +29.6 pts (8m) / -4.1 pts (5m)
 - Cue: Classic "thin Asia → trend up" day; prefer longs from OR-H.
 - OR Swept Low (n=7)
 - London first: Low 57.1% (cont.) / High 42.9%
 - Median penetration: +21.2 pts (10m) / -18.2 pts (0.5m)
 - Cue: Short is fine, but magnitude is smaller than up-days in this bucket.
 - OR Swept Both (n=3) [LOW N]
 - London first: Low 66.7%; Median: +27.0 (15m) / -15.9 (12.5m)
 - Cue: Two-way; wait for London confirmation.
 - OR No Sweep (n=1) [LOW N]
 - London first: High 100%; Median: +29.2 (4m) / -12.1 (17m)
 - Cue: Expansion day; follow the first London breach.

2) PL Swept Low (n=259) (the largest bucket)

- OR outcomes distribution: No Sweep 8.5%, Swept Low 30.1%, High 51.7%, Both 9.7%
 - OR Swept High (n=134)
 - London first: High 59.0% (cont.) / Low 38.8%
 - Median penetration: +24.8 pts (6m) / -26.2 pts (8m)
 - Cue: Buy the OR-H reclaim/hold; this is the most common path on small-Asia days.
 - OR Swept Low (n=78)
 - London first: Low 51.3% / High 48.7% (balanced)
 - Median penetration: +22.1 pts (10m) / -14.0 pts (5m)
 - Cue: Tradable both ways; keep targets tighter on the downside.
 - OR Swept Both (n=25)
 - London first: High 68.0%
 - Median penetration: +19.8 pts (3m) / -36.9 pts (21m)
 - Cue: Often a "fake down then up" day; fade the downside flush once reclaimed.
 - OR No Sweep (n=22)
 - London first: High 63.6%
 - Median penetration: +24.2 pts (17m) / -15.5 pts (5m)
 - Cue: Wait for London breach; favor the first High breach.

3) PL Swept High (n=189)

- OR outcomes distribution: No Sweep 8.5%, Swept Low 49.7%, Swept High 36.0%, Both 5.8%
 - OR Swept Low (n=94)
 - London first: Low 61.7% (cont.) / High 38.3%
 - Median penetration: +20.3 pts (9.5m) / -29.5 pts (6m)
 - Cue: Short the OR-L retest; continuation down dominates.
 - OR Swept High (n=68)
 - London first: High 58.8% / Low 39.7%
 - Median penetration: +17.4 pts (3m) / -22.9 pts (18.5m)
 - Cue: Upside can continue, but downside tails are long/slow → trail and be patient.
 - OR Swept Both (n=11) [LOW N]
 - London first: High 63.6%
 - Median penetration: +11.0 pts (7m) / -26.9 pts (53.5m)
 - Cue: If London sweeps Low later, bearish closes show 87.5% in sample → watch for late-session roll.
 - OR No Sweep (n=16)
 - London first: High 50% / Low 50%

extensions, while small Asia days are tighter and slower.

Practical Application

1. Same-Side Continuation after OR

Enter on retest of the swept OR edge (reclaim / fail).

Continuation probability $\approx 70\text{--}86\%$.

TP1 = $\frac{1}{2}$ median; TP2 = $1\times$ median; runner toward OR range multiple.

2. Flip-and-Go after Fakeout

If OR flips against PL, let London sweep and reclaim.

Enter on the retest; book earlier profits due to two-sided risk.

3. Avoid Weak Contexts

Tiny OR range + no retest or mixed PL bias = low-probability environment.

Flat tape after Asia + no clear PL edge
